❖ Bloom's Taxonomy and its application in PSOs:

Benjamin Bloom and his collaborators in 1956 developed a framework to categorize and achieve educational goals. It consists of taxonomy of educational objectives based on six major categories viz Knowledge, Comprehension, Application, Analysis, Synthesis, and Evaluation.

(a) Knowledge: It involves the recall of methods and processes.

(b) Comprehension: It implies understanding or apprehension being communicated.

(c) Application: It relates with the use of abstractions in particular and concrete situations.

(d) Analysis: It includes the “breakdown of a communication into its constituent elements to make the ideas more clear.

(e) Synthesis: It is the concept of creativity by putting together parts so as to form constructs the knowledge.

(f) Evaluation: It implies the judgments for given purposes.
