Profile Summary

I am delighted to express my happiness that I got great opportunities to work in the area of academics, administration, skill education and incubations. I am glad that I succeeded in the promotion of skill and need based education. I wish to continue my endeavour in future as well.

While working as Pro Vice-Chancellor of Dr. Babasaheb Ambedkar Marathwada University, Aurangabad, I initiated efforts to carry out the Academic & Administrative Audit of the University Departments first time in the history of the university and successfully completed it. University five-year prospective plan is also successfully prepared where we used the survey data of 15000 stakeholders from different sectors as a base. Government of Maharashtra appointed me as a nodal officer for establishment of Saintpeeth at Paithan. Proposal for Saintpeeth central university and Saintpeeth sub-centre is submitted to central government and state government. I have taken initiative to establish Skill Development Institutes at Jalna, to promote skill education at university level. Also, during my tenure, I started new Soft-Skill Development College, Community College and bachelor of Vocational College in university jurisdiction.

While perusing the works of NAAC assessment & accreditation, the utmost care was taken for quality enhancement & performance at academic & administrative level, as a result of that the University received 'A' grade with CGPA score 3.22 in reaccreditation by NAAC in which for curriculum framing the University got 3.72 CGPA. The Earn & Learn Scheme was entitled with only Rs. 1100 to Rs. 1300 per student. In order to ensure the minimum maintenance charges for students the amount has been enhanced to Rs. 2000 per student. The fellowship for wards of farmers & agricultural labourers was reinitiated that has been discontinued. The pending works regarding the Model College at Ghansavangi have been reinitiated & preparations were advanced so that college is shifted to its own building by June 2019.

While working as a Chairman of Sub-centre Campus of University at Osmanabad initiatives were taken to start girls' hostel at campus area. Community Radio programme is started for education in collaboration with Dnyanvani. Academic MOUs are signed with various universities of Japan, China, Spain, Nepal & Sri Lanka for international exposure to staff & students.

Three Incubation centres were established in the University campus in order to promote incubation of business ideas from different stakeholders & encourage the students & faculties. Initiatives are taken to commence 73 skill courses, 24 community colleges & 15 B. Voc. Courses in academic year 2018-19.

Moreover, from past 29 years I am engaged in improvising quality of Higher Education at UG & PG level and wherever I got opportunity to work on various academic committees in the University and other bodies like Senate, Board of Studies, Examination Committee, Research Committee etc. As a part of this mission Deogiri College secured highest CGPA (3.75) in NAAC accreditation 2016 in the entire Maharashtra at that time.

I am instrumental for initiating Skill Education Program under PMKVY scheme of central government. I have also taken the initiative to start first Vocational degree program (B. Voc.) in Maharashtra State in Jewellery Design and Gemology at Deogiri College, Aurangabad. As a part of its success, I am working as a technical expert for Gold Cluster, Department of Entrepreneur Development, Government of Maharashtra.

Being from rural background, I closely witnessed the gambling associated with uncertain rain and farming. I therefore, decided to tackle this issue with strategic water conservation plans. I am determined to concentrate my research in the field of Hydrogeology and Petrology. I studied various Watersheds, Soil types, Rock Strata & Hydrogeological Characters by using modern technologies like Remote Sensing and GIS based tools for effective watershed development. Since last 15 years, I am providing my services to various NGO, Educational institutes, Private Industries & Government of Maharashtra for planning effective Watershed Management Programs like Jalyukt Shivar Yojna, Shivkalin Jalsampada etc. These efforts led to achieve maximum success in government schemes to minimize water scarcity and helped to provide potable water to rural communities of Maharashtra state. It included the sites at Sandas Village of Tq. Kalamnuri, Dist. Hingoli, GP-10 Watershed of Aurangabad District & Sindkhedraja Watershed of Buldhana District and they are the most successful schemes I consulted. The issues for drinking water are permanently resolved at these places.
