REPORT ON CARE TAKER PROGRAM FOR TREES ON THE CAMPUS

Introduction:

The idea of the present activity came from the Global Teacher Award winner teacher named **Mr. Ranjitsinh Disale** from Solapur district of Maharashtra. As the similar ideas like that of Mr. Ranjitsinh, Dr. Vishnu Patil addressed students demanding taking up such similar project at the Deogiri College, Aurangabad, certain students showed their interest in the project after watching the video of Mr. Ranjitsinh Disale.

The purpose of this project is to provide proper botanical information about the trees on the college campuses and to provide caretakers to the respective trees which have been allotted to them.

The major benefit of this project is being able to provide additional information in a digital format using modern QR technology. Each tree on campus will have a unique QR code attached to it. Students can scan the QR code of a tree to get all the detailed information about the tree and the caretaker of the particular tree.

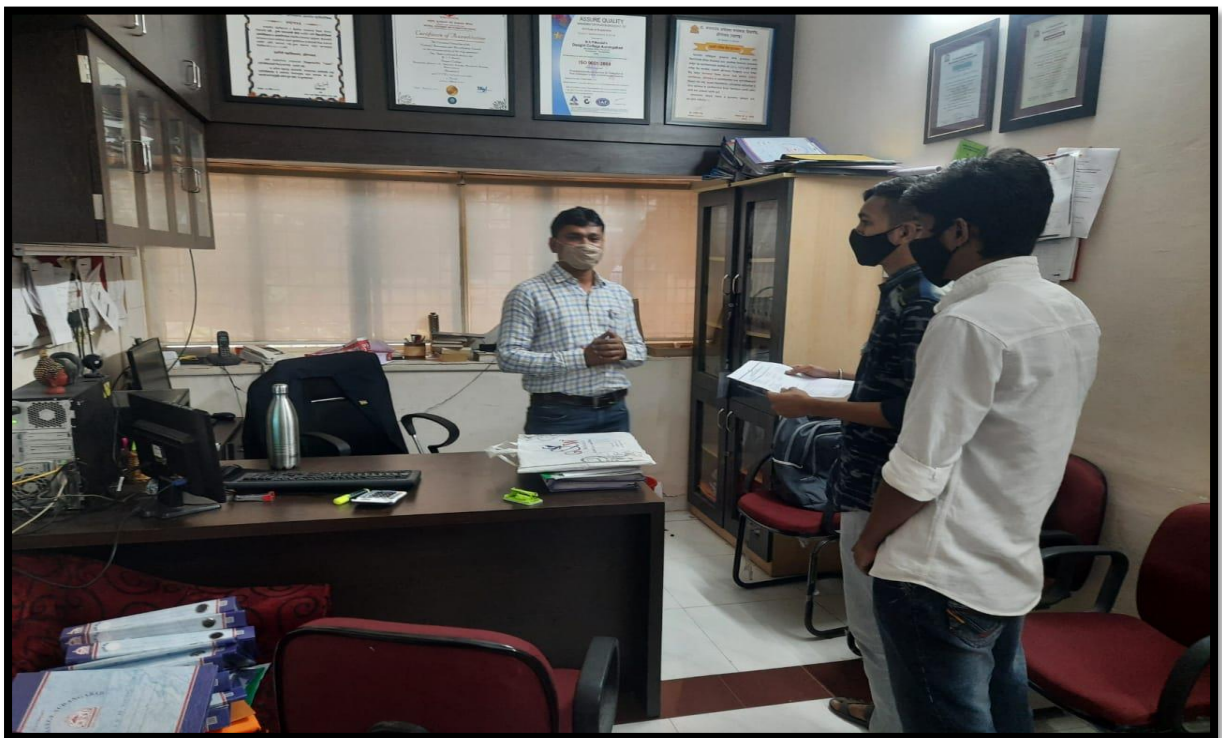

This project has been completed by Vishnu Sanjay Kabra (T.Y. BSc) under the guidance of Dr. Vishnu Waman Patil Sir (Coordinator IQAC, Deogiri College Aurangabad)
